Antenna socket EDA 3902 093700 Design through-type socket, flush-mounted installation, cover without, connection loss at 860 MHz 1.5 dB, connection loss at 2150 MHz 2 dB, number of outlets 3, use of antenna socket (FS 302 F) Features: Can be used as an end socket with three connections. Use in single antenna systems, behind a multi-switch or on a decoupled spur line. The connection for the satellite receiver is designed as an F socket. This can also be used to transmit DC voltage (max. DC 24 V 500 mA) to a satellite antenna. Notes: For screw mounting only. Danger! Observe the installation space for plugs and bending radii. Please note for applications with couplings: Not suitable for duct installation and standard device socket. Connection with angle plugs recommended. When using these connectors, there is a power limit of 15 watts for connected devices. Installation recommendation: Kaiser electronic boxes Flush-mounted installation: Kaiser Order No.: 1068-02 Cavity wall installation: Kaiser Order No.: 9062-94 Concrete installation: Kaiser Order No.: 1268-40
